

Muhammad Huzaifa

Software Engineer

Karachi, Pakistan | 0310-2003791 | m.huzaifa157@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Software Engineer focused on building full-stack web and mobile applications end-to-end. Experienced in designing REST APIs, implementing authentication and role-based authorization, developing responsive user interfaces, and deploying applications on modern cloud platforms.

SKILLS

- **Languages & Frontend:** JavaScript, Java, TypeScript, React.js, Next.js, React Native, Tailwind CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Passport.js, MVC Architecture, Mongoose
- **Databases:** MongoDB, PostgreSQL, MySQL, Prisma, Neon, Supabase
- **Tools & Platforms:** Git, GitHub, Docker, CI/CD, Postman, Vercel, Azure, ImageKit, Expo, VS Code

EXPERIENCE

Software Engineer | BranDive Media Solutions

Jul 2026 - Current

React.js, Next.js, Node.js, Express.js, MongoDB, Recharts, Tailwind CSS, JWT

- Designed and implemented MongoDB schemas and Node.js/Express.js REST APIs for DentalFlow, a multi-branch dental clinic management portal, modeling relationships between patients, appointments, prescriptions, and invoices while enforcing JWT-based authentication and role-based authorization.
- Built an appointment booking engine (branch → treatment → doctor → time-slot selection) and developed four role-specific dashboards in React/Next.js, supporting operations across multiple clinic branches.
- Developed analytics dashboards with Recharts to visualize revenue, patient growth, and doctor/branch performance; tested core application workflows and produced ER diagrams, system-flow documentation, and technical handoff materials.

PROJECTS

Wanderlust — Travel Listing Platform

[GitHub](#)

Node.js, Express.js, MongoDB Atlas, EJS, Passport.js, Cloudinary, Mapbox, Azure

- Built a listing marketplace with owner-scoped authorization enforced at the middleware level, so users can only edit or delete listings and reviews they created.
- Integrated Cloudinary for image uploads and Mapbox geocoding with MongoDB GeoJSON for interactive location mapping.
- Deployed to Azure with environment-based config, MongoDB-backed sessions, and server-side input validation on all forms.

Expense Tracker — Cross-Platform Mobile App

[GitHub](#)

React Native (Expo), Node.js, Express.js, MongoDB Atlas, JWT

- Built a single Expo codebase running on iOS and Android, with JWT auth persisted via AsyncStorage for login that survives app restarts.
- Designed RESTful APIs for authentication and expense CRUD operations, with input validation and consistent HTTP status codes on error.
- Implemented reusable UI components and navigation flows with React Navigation and NativeWind for a consistent cross-platform experience.

AI Studio — Video Publishing Platform

[GitHub](#)

Next.js, TypeScript, MongoDB Atlas, NextAuth, Tailwind CSS, ImageKit, Vercel

- Built a typed API layer with role-based access control, request validation, and structured error handling on every route.
- Integrated ImageKit for optimized media storage and delivery, with transformations served over CDN instead of raw uploads.
- Deployed on Vercel with protected API routes and environment-based configuration.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Expected 2027

UBIT, University of Karachi

Intermediate in Computer Science

2023

Adamjee Govt. Science College
