SUMMARY

Software Developer with 2 years of working experience designing, developing, and deploying full-stack applications for real-world and client projects. Experienced across frontend and backend development, REST APIs, authentication, RBAC, database design, and application architecture. Familiar with AI/LLM integration and cloud deployment, with a strong focus on building reliable, secure, scalable, and maintainable software.

SKILLS

- **Languages:** JavaScript, TypeScript, C#, SQL
- **Frontend & Backend:** React.js, Next.js, Node.js, Express.js, ASP.NET Core, Tailwind CSS, React Native, NativeWind
- **Databases:** MongoDB, Mongoose, PostgreSQL, Prisma, Entity Framework Core
- **AI & Cloud:** LLM APIs, AI Integration, AWS, Vercel
- **Engineering:** JWT, Authentication & Authorization, RBAC, API Design, Database Design, CRUD, API Integration, Git

Work EXPERIENCE

Software Developer | BranDive Media Solutions

January 2026 – Sep 2026

- Developed and delivered full-stack applications across diverse business domains, translating business requirements into scalable, maintainable, and production-ready software solutions.
- Built responsive and reusable frontend interfaces and RESTful APIs using React.js, Next.js, Node.js, and Express.js, integrating frontend workflows with backend services.
- Designed and implemented database-driven workflows, authentication, authorization, and RBAC while maintaining application reliability, security, and code quality.
- Developed server-side business logic, API integrations, validation workflows, and data-access layers using MongoDB and PostgreSQL-based applications.
- Collaborated with developers and stakeholders throughout the software development lifecycle, from requirement analysis and implementation to testing, debugging, deployment, and ongoing improvements.
- Diagnosed and resolved application issues and improved existing features to deliver reliable, maintainable, and user-focused software.

Freelance Software Developer | Independent

NOV 2024 – Present

- Developed and deployed full-stack web applications for clients across multiple domains, taking ownership from requirements analysis and solution design through development, testing, deployment, and maintenance.
- Built responsive frontend interfaces, RESTful APIs, database-driven workflows, authentication systems, and third-party integrations based on client requirements.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Expected 2027

UBIT, University of Karachi

PROJECTS

DentalFlow — Multi-Branch Dental Clinic Management Platform | [GitHub](#)

- Developed a full-stack dental clinic management platform supporting 3 branches and 4 user roles, with 14 MongoDB models and 49 REST API endpoints covering appointments, medical records, prescriptions, invoices, and payments.
- Implemented JWT authentication and server-side role-based access control (RBAC) across patient, doctor, receptionist, and administrator workflows, with dedicated dashboards for each role.
- Engineered appointment availability logic, analytics dashboards, and database seeding workflows; deployed the application using Vercel and MongoDB Atlas.

Healthify — D2C Healthy Meal Subscription Platform (UAE)

- Built a responsive healthy meal subscription platform for the UAE market using **React, React Native for Web, TypeScript, and Tailwind CSS**.
- Developed reusable cross-platform UI components and responsive layouts for consistent web and mobile experiences.
- Implemented interactive meal plan sections, calorie and macro-focused content, AED pricing presentation, FAQ sections, and conversion-oriented user flows.
- Deployed the production frontend on **Vercel** with a focus on responsive design, performance, and maintainable component architecture.

Wanderlust — Full-Stack Travel Marketplace | [GitHub](#)

- Built a travel marketplace supporting listing creation, image uploads, reviews, price filtering, and paginated discovery.
- Secured state-changing workflows with Passport.js authentication, ownership-based authorization, Joi validation, rate limiting, and NoSQL-injection sanitization.

- Integrated Cloudinary image storage and Mapbox geocoding with MongoDB GeoJSON for interactive listing maps.

Expense Tracker — Cross-Platform Mobile App | [GitHub](#)

- Built and shipped a single Expo codebase for iOS and Android with persistent JWT authentication using AsyncStorage.
- Created reusable UI components and navigation flows with React Navigation and NativeWind for a consistent cross-platform user experience.
- Built RESTful APIs for authentication and expense CRUD with server-side validation and standardized error responses.

ACHIEVEMENTS

- **Selected for the Prime Minister's Youth Laptop Scheme** based on high academic performance, 2025
- **Certificate of Completion** — Web Development, Apna College, 2025
- **Certificate of Appreciation** — Participation in Inter-University Tech competitions, University of Karachi, 2026
